Memorial Symposium Primus-E. Mullis
27th January 2017

Primus left us one year ago, but he is still with us in thought with lots of joyful memories, that will remain well into the future.

Primus Mullis was a dedicated pediatric endocrinologist and diabetologist, who cared for children and adolescents, and trained many a student and fellow. Primus Mullis also made major contributions to the world of science as an active researcher in the field of childhood growth and pituitary disorders and in his services to many societies, councils and commissions.

In memory of Primus Mullis colleagues, friends and family members are welcome to share a day to discuss the topics of pediatric endocrinology he loved so much during a Symposium at the Auditorium Ettore Rossi, University Children’s Hospital of the Inselspital, University of Bern, Switzerland.

We thank the presenting colleagues and the pharmaceutical industry partners for their support.

Please join us on Friday, 27th January, 2017.

Sincerely,

Prof. Christa E. Flück
Pediatric Endocrinology/Diabetology

Prof. Christoph Aebi
Director of Pediatrics

PROGRAMM 2016

09.00 Welcome (Christoph Aebi)

09.15 - 10.45 Symposium 1 (Chairs: Flück / Zumsteg)

S1 Congenital hypopituitarism: genotype-phenotype correlations (Mehul Dattani, London)

S2 IFG2 regulation – implication on fetal and postnatal growth (Irene Netchine, Paris)

S3 Optimizing GH treatment (Michael Ranke, Tübingen)

10.45 - 11.15 Coffee

11.15 - 12.30 Invited Free Communications (Chairs: Janner / Hauschild)

F1 Novo Nordisk: Somapacitan, a reversible albumin-binding GH derivative, possesses a once-weekly treatment profile in children with GH deficiency (Michael Højby Rasmussen, Copenhagen)

F2 Merck: Adherence in pediatric GH treatment (Udo Meinhardt, Zürich)

F3 Eli Lilly: From diagnosis to treatment – SHOX deficiency and other forms of short stature (Klaus Mohnike, Magdeburg)

F4 Sandoz/Novartis: PATRO children, a multi-centre, non-interventional study of the long-term safety and efficacy of Omnitrope® in children requiring GH treatment (Roland Pfäffle, Leipzig)

F5 Pfizer’s commitment to research and medical education (Roy Gomez, Brussels)

Lunch break (including coffee)

14.00 - 15.30 Symposium 2 (Chairs: Schwitzgebel / Konrad)

S4 Bizzare cases of GH deficiency (Gerald Theintz, Lausanne)

S5 The Swiss GH registry (Grit Sommer, Bern)

S6 Autosomal dominant GHDII – Bench side studies (Maria Miletta, Bern)
